

CONTENTS

- 547 Multi-Response Optimisation of Turning Process Parameters with GRA and TOPSIS Methods
Ficko, M.; Begic-Hajdarevic, D.; Hadziabdic, V. & Klancnik, S.
- 559 Minimizing Total Production Cost in a Hybrid Flow Shop: a Simulation-Optimization Approach
Istokovic, D.; Perinic, M.; Vlatkovic, M. & Brezocnik, M.
- 571 Simulation Project for Logistics of Brazilian Soybean Exportation
Lopes, H. S.; Lima, R. S. & Leal, F.
- 583 Simulation of Temperature Evolution of Cork Composites During Moulding Process
Lopes, H.; Silva, S. P. & Machado, J.
- 595 Effect of Vibration on Surface Roughness in Finish Turning: Simulation Study
Kang, W. T.; Derani, M. N. & Ratnam, M. M.
- 607 Analysis of Rock Dynamic Stresses During the Drilling by Polycrystalline Diamond Compact Bits
Yu, J. P.; Zou, D. Y. & Zhang, Y.
- 619 Simulator with Embedded Intelligence Focused on the Design Process
Arango, I. & Herrera, A.
- 631 Aerodynamic Characteristics of the X-Tail Stabilizer in a Hybrid Unmanned Aircraft
Czyz, Z. & Karpinski, P.
- 643 Coupling Properties of Chain Drive System under Various and Eccentric Loads
Ren, W. J.; Wang, L.; Mao, Q. H.; Jiang, S. B. & Huang, S.
- 655 Simulation of Pneumatic Systems Using Automation Studio™ Software Platform
Ghinea, M.; Agud, M. & Bodog, M.
- 667 Identification of Cutting Chatter through Deep Learning and Classification
Gao, H. N.; Shen, D. H.; Yu, L. & Zhang, W. C.
- 678 Multi-Objective Master Production Schedule for Balanced Production of Manufacturers
Wang, C.; Yang, B. & Wang, H. Q.
- 689 Structural Parameters Optimization for a Proportional Solenoid
Yu, Y. X.; Ke, S. D. & Jin, K. D.
- 701 Solving Multi-Robot Picking Problem in Warehouses: a Simulation Approach
Jiang, H.
- 713 Cooperative Automatic Control for the Canopy Posture of a Four-Leg Hydraulic Support
Hu, X. P.
-
